
How to set up Security Key for your Microsoft Account

Windows Hello and security keys

Now you can sign in without a password using Windows Hello or security keys. A security key is a physical device (like a USB security key) that you can use to sign in to your account instead of a password. [Learn more about signing in with Windows Hello or a security key.](#)

Recovery code

You can use your recovery code if you lose access to your security info. You need to print out your recovery code and keep it in a safe place.
